Important Safety Information about CRESTOR® (rosuvastatin calcium) Tablets

- CRESTOR is not right for everyone. Do not take CRESTOR if you are nursing, pregnant or may become pregnant; have liver problems; or have had an allergic reaction to CRESTOR
- Your doctor should do blood tests to check your liver before starting treatment with CRESTOR and if you have symptoms of liver problems while taking CRESTOR
- Call your doctor right away if you:
 - Have unexplained muscle pain or weakness, especially with fever
 - Have muscle problems that do not go away even after your doctor told you to stop taking CRESTOR
 - Feel unusually tired
 - Have loss of appetite, upper belly pain, dark urine, or yellowing of skin or eyes

These could be signs of rare but serious side effects

- Elevated blood sugar levels have been reported with statins, including CRESTOR
- Side effects: The most common side effects may include headache, muscle aches, abdominal pain, weakness, and nausea. Memory loss and confusion have also been reported with statins, including CRESTOR
- Tell your doctor and pharmacist about other medicines you are taking

Talk to your doctor about prescription CRESTOR.

Approved Uses for CRESTOR

When diet and exercise alone aren't enough to lower cholesterol, adding CRESTOR can help.

In adults, CRESTOR is prescribed along with diet to lower high cholesterol and to slow the buildup of plaque in arteries as part of a treatment plan to lower cholesterol to goal.
